EXPERIENCE

Freelance - Java Minecraft Developer

February 2021 - July 2021

- I have worked with a team in **developing a private core for a server** with the main objective of creating more than 100 functionalities. Some of those were: +60 commands, game modes, team systems, territory systems, account register/login systems, etc.

The main technologies used in this project were: Java and MySQL.

Freelance - C# Developer

October 2020 - December 2020

- I have worked on developing a **desktop software for business management**. The software included product, customer and sales registration, graphical statistics, product filters, etc.

The main technologies used were: C#, WinForms, SQL Server, Bunifu UI Framework.
